

More For 3s & 4s

Why Should My Child Go To Preschool?

Preschool is not only wonderful preparation for elementary school; it's a place where young children can meet and interact, feel safe away from mom and dad, learn, and have fun! A quality preschool stimulates your child's imagination and physical, social, and emotional development. It also provides opportunities for intellectual exploration.

In preschool, children learn to relate to adults outside their families and to develop independence. Playing in a group provides children opportunities to learn how to share, take turns, cooperate, and solve problems. Playing with materials and participating in activities that are designed or selected specifically for young children helps them develop early reading, writing, science, art, math, and other skills. These activities broaden children's experiences and are springboards for later learning.

More For 3s & 4s is an Osseo Area Schools' Community Education Preschool Program.
